

Project Profile

Cottonwood Christian Center
Los Alamitos, CA

System Features

The church desired a high-energy, contemporary AV system for both its youth and 3,000-seat sanctuary auditoriums. It now boasts high-performance equipment to accommodate its growing congregation.

- A 22-Channel wireless mic system was designed and installed to meet church needs while accounting for an adjacent racetrack and nearby Air National Guard
- A digital front-of-house and on-stage monitor mixing console was installed to provide easy and accurate management of the many required mixes
- Installation also includes audio systems, distributed sound, fiber-optic wiring, and 18,000-lumen HD video projectors
