## System Features

Desert Spring desired excellence architecturally, aesthetically and acoustically. Ford AV assisted with room acoustical design, sound reinforcement, theatrical lighting and video projection/distribution that complemented the church's aesthetic preferences.

- The audio system includes loudspeakers along the platform, across seating sections and choir monitors, dual and single subwoofers, an in-ear monitoring system, and microphones
- Three LCDWXGA projectors with screens and a switcher make up the video production system that is used for congregational viewing and confidence monitoring
- Theatrical lighting features varying degrees of ellipsoidals and a lighting controller
